ABOUT ME

Final-year Artificial Intelligence & Data Science student with strong foundations in Software Development, Machine Learning, and Data Analytics. Skilled in Java, Python, SQL, and data visualization tools. Experienced in building real-world applications including Post-Quantum Cryptography systems and ML-based recommendation engines. Passionate about solving complex problems and developing scalable solutions.

INTERNSHIP

Java Full Stack Developer	02/2026 – Present
• Gaining hands-on experience in Core Java, JDBC, and backend development • Working with HTML and CSS for frontend design • Practicing SQL and database management concepts • Developing mini projects to understand real-world application development	KodNest,Bangalore

EDUCATION

S G Balekundri Institute of technology	2022 – 2026
<i>B.E. Artificial Intelligence & Data Science</i>	Belagavi
CGPA : 8.04	
Narayana girls residential PU college	2020 – 2022
<i>Karnataka State Board</i>	Banglore
85%	
Basaveshwar International Public School	2020
<i>CBSE</i>	Bagalkot
87 %	

LANGUAGES SPOKEN

English	Hindi
Kannada	

PROJECTS

Post-Quantum Cryptography using Quantum AI
• Implemented Kyber-based Post-Quantum Cryptography for secure key exchange • Integrated anomaly detection using Qiskit (quantum computing framework) • Developed backend using Flask for encryption and decryption workflows

Medicine Recommendation System

- Built a machine learning model to recommend medicines based on symptoms
- Used Python, Pandas, and Scikit-learn for data preprocessing and modeling
- Improved prediction accuracy using classification algorithms

TECHNICAL QUALIFICATION

Languages

- Java
- SQL
- C

Web Technologies

- HTML
- CSS
- JavaScript

Tools & Platform

- Power BI
- Tableau
- MS Excel

Core Concepts

- DBMS
- OOPs
